Mr. McArdle stated how they have been telling them that for the last several years. MINUTES FOR REGULAR MEETING OF NESQUEHONING BOROUGH COUNCIL

Wednesday, June 22, 2022 at 6:00 p.m., Borough Office

Councilwoman Fox asked Mr. McArdle if he could explain the situation at the Lake. Mr. McArdle stated how the fire hydrant system was installed, when they were developing the property, 1940s. He stated how they have a small main that goes through the Lake. He stated that over the years, there was a scale that would build up inside the pipe, which restricts the amount of water. Mr. McArdle stated how the fire department needs volume of water, not pressure of water. He stated that the original homes that were built at the Lake were small cabins and now they were building multimillion dollar homes. Mr. McArdle stated how they had met with the Water Authority, but they did not have any money and they were going to apply for grants. He stated how the fire protection for the residents of Lake Hauto was hampered, because they have hydrants that produced water but not adequately to fight fires. Mr. McArdle stated how he has been told that having water coming out of the hydrant was the Water Authority's only responsibility.

Mr. McArdle stated how the Lake Hauto Club had installed four dry hydrants in the 80s. He stated that they periodically have the divers go in to take the scaling off of the pipe and to make sure that there was no damage done to the pipe. Mr. McArdle stated how they have a water problem over at the Lake and they have provisions in place. Councilwoman Guardiani asked Mr. McArdle if there was some kind of product that they could run through the pipe to de-scale the system. Mr. McArdle stated how he was talking about two different kinds of pipes. He stated that the one pipe that they put out into the Lake; 8" pvc pipe -- approximately 40' -- 50' into the Lake, which has holes like they would use for a French drain. He stated how that draws the water in, but the scaling occurs at the holes, which just has to be brushed off. Mr. McArdle stated that the other scaling that he was referring to was the underground Lansford/Coaldale Water Authority piping. He stated how the normal size for a water main was 6" -- 8" and they only had a 4" line.

Councilman Paul moved and Councilwoman Guardiani seconded to accept the Public Safety Committee Report, which includes the Mayor/COG Report, Police Report, Civil Service Report, Housing & Code Report and Emergency Management Report. All voted yes. Motion passed.
